

SUSPENSION SISTEM: AS-250

TECHNICAL SPECIFICATIONS

Suspension System		Shock	Warranty
Model	AS-250	Weight	Metal structure and shock 2 years
Color	Anodized, Inox (Standard), 20µm	Adjustments	Maintenance
Material	AL 6082, 6061-T6, 5083-H321 SST 316 / 304L	Damper shaft	Structure
Bearings	Nylon bearings x4		Shock
Weight	10,1 kg		Applications
Dimensions	(250-220)x(350-380)x230		
Passenger weight	75-110Kg (165-242,5lbs) Standard Optimum Range	Riding style	

The mechanism " AS-250" has been designed to cooperate with any seat which is going to be used for giving shock mitigation to extreme or pleasure high speed crafts.

The mechanism, due to its geometry and the reclining shock adjustment, provides:

Wider range of passenger weight. Better comfort conditions during any trip or mission. Optimal body posture for handling both static and dynamic loads. Optimum shock mitigation for spine and neck.
